

Anti-Reciprocity Interests Have Engaged Notable Lawyer to Conduct Their Campaign

Fifth Stable Opened to Accommodate Equines in Spring Races.

Fifty-two horses entered in the spring 'race meet of May 24th and 25th are now stabled at the Exhibition Grounds, and the start-up of eight runners will arrive from Wetaskiwin this afternoon making a total of sixty. It has

been found necessary this week to open a fifth stable for the accommodation of the horses. There is every indication that the race meeting will be the best ever held in Alberta. There are eleven vint, six of the card for May 24th and five for May 25th. The purses offered aggregate \$3,500 in value. The pro-

in operation for the races and the handling of the crowds will thus be very much facilitated. It is expected that the car service will be inaugurated on Saturday of this week.

of the recreation park adjoining the Exhibition Grounds has been commenced by the Exhibition Association. A band stand was erected last week, and work has been started on a dressing room for football and baseball players. A lunch pavilion provided with a stove at one end and a sink at the other, and a picnic parties.

In the Exhibition Grounds, an addition to the sheep building, 60 feet in length, and a similar addition to the swine building have been completed. A new swine building, 150 feet in length, has also been built, and a horse hospital and blacksmith shop have been put up. Considerable work is being done on the cattle buildings, and the cattle pens. The exhibitions are at present held up by lack of material, the mills waiting for supplies of logs.

Two hundred elm trees, from five to six feet in height, were planted out in 19 grounds along the boulevards last week. A start was also made on a nursery of trees for future use. Seedling classed in the group of 500 were planted 1,600 ash seedlings and 1,600 Caragana seedlings. The latter were secured from the Patmore Nurseries of Brandon.

A meeting of the directors of the association will be held tonight, at which the contract for the construction of the live stock pavilion will be awarded.

**MUSICAL FESTIVAL
TO OPEN TOMORROW**

Opens Tuesday Afternoon, May 16th, at 2 p.m.—Annual Medical Exhibition, at 2 p.m.—Musical Festival, at 7 p.m.—Lecture by Mrs. Mary Ann Tisdale, at 8 p.m.—Interest-Programme and List of Competitions.

For some time inquiries have been heard on all sides relating to the "festival" which has become not only a feature of the season, but to the people of this province.

an intellectual and musical trust that would find it difficult to survive in the charge of the business connected therewith, decided some months ago that it was inadvisable to defer the date for its dissolution until after the middle of May, on account of the fact that Edmonton would be surfeited with music early in the season. The Music Festival, Michaelman and lastly, the Sheffield Chorus have come and gone, and yet the question has not been solved. The answer is "Coming on." The secretary, Mr. Jansdown, reports that never in the previous years has such an interest been evinced, and so, the concert has been moved on to a date which means much from the educational standpoint.

ture the features of last year's competition, and the closing concert held in the Thistle Rink, at which thousands attended. As in previous years, the competitions will be held in the All Saints' Schoolroom, beginning at two o'clock p.m., and will continue until Thursday afternoon at four o'clock. It was found necessary to extend the time on account of the addition of a number of competitions, notably mixed voice quartets and song duets. Year by

The number of competitions has been increased, and in the present syllabus competitions are open in more than twenty-eight classes. The first night-singing day will be at the Thistle Inn, on Second street, at eight o'clock sharp, the choral competitions will be held. This promises to be a night-singing day, with a large and well-organized choir, and will include large and small choirs of the city and from the surrounding towns. At 9.45, the night-singing test will be given. At 10.15, the singing day will be devoted to tests in piano accompanying and night-singing, finishing in the afternoon with mixed and male quartettes and father-chorus singing. At 11.45, a grand concert by the married chorus and orchestra will be held in the Thistle Inn. This concert, which will be a fine display of the talent of this honor the Lieutenant Governor, will be participated in by the

Eight Convictions For Illicit Traffic in Alcoholic Beverages.

Eight convictions for selling keeping liquor without a license were made in the province last week through the activity of the liquor license branch of the attorney general's department. In each case conviction carried along a fine of \$100 and costs.

The convictions were as follows:
E. Carter, convicted May 16th, 1904, for selling liquor without a license at St. Mal de Metis.
H. Brayherer, convicted before Pozer, J.P., at Vegreville, on May 12th, for selling liquor without a license at DuVerney.
J. B. Vincent, convicted before Pozer, J.P., at Vegreville, on May 12th, for selling liquor without a license at DuVerney.
St. Peter, convicted before H. Pozer, J.P., on May 12th, for selling liquor without a license at Broseau.

Lou Coles, convicted before W. Gray, at Steitler, on May 12th, keeping liquor for sale without a license.

May 12th, at Castor, before E. H. Matthias, J.P., and Frank Burch, J., for selling liquor without a license.

The offices of the Liquor license department have been moved from the first floor of the government buildings to the rooms in the baze-ne formerly occupied by the provincial analyst, Dr. Revell.

Parade With 2,000 in Line Held From Fort Osborne Barracks to Cemetery Attracts 100,000 Spectators—Hundreds of Regiments Represented

British military forces and even non-military personnel, including the celebrated naval commands, paraded to the cemetery of St John's yesterday afternoon and decorated the graves of departed comrades interred there. The parade, under most ideal weather conditions, attracted a hundred thousand spectators to various points along the two miles route from the Fort Osborne barracks to the cemetery.

Rev. A. W. Woods addressed the assemblage at the barracks, and Rev. Canon Gill delivered the sermon in the cemetery. Sir Daniel MacDonnell, lieutenant governor and Col. R. Steele, M.V.O., C.B., D.O.C., presided.

This was the first occasion in the 25 years the ceremony has been performed, that the city of Winnipeg took official part in it, the members of the council attending in a body and contributing many handsome floral decorations.

The arrangements were carried out without a hitch, and the cloudy day

after the deluge of the night before made marching easy and free from dust.

The Charles May Real Estate Company negotiated the sale on Saturday of another large block of suburban property to Vancouver capitalists. The property in question is the Goulet Estate, a 100-acre tract in the West End. Purchasers were Messrs. T. J. Strain, J. H. Carlson and W. L. Hamilton, all of Vancouver. The \$6-million price was over \$100,000 more.

The subdivision of Fredericton, the quarter section adjoining Sherbrooke and Albert streets, was sold by F. C. Lowe & Company to Pacific Coast capitalists for \$550 a acre. There are 156 acres in the property, which will be subdivided at once and sold.

on the market by C. R. Lowes & Co. City Assessor McMillan has issued a complete directory of the owners of real estate in Edmonton. The book is one of the finest pieces of bindery work which has ever been turned out in the city. It is bound in leather and is exceptionally reliable. The printer states that the book and the city assessor states that the information contained between the two covers of the book is absolutely correct. The data is revised up to the information at present in the hands of the assessment department. It is Mr. McMillan's intention to issue a supplement as soon as the

year's work of assessing is complete and the court of revision has finished its work. The printing and binding of the book was done by the Bulletin of the

Edmonton Portland Cement Company, Limited

CAPITAL STOCK
\$1,500,000

CAPITAL STOCK
\$1,500,000

LIEUTENANT GOVERNOR G. H. V. BULYEA, Chairman of the Board.

The remarkable facts of the Edmonton Portland Cement Company Limited, which were set forth in the first six articles of these series published in all the daily papers of Edmonton are re-stated briefly in the following digest. Every citizen of Edmonton who believes the facts of this great enterprise will have shares in the Company to the extent of his ability to purchase. No argument is required to induce a man to purchase stock in a Company where he can double his money in two years, and get forty per cent. dividends for forty years.

ARTICLE NUMBER SEVEN

In the series of six articles which were published in all of the Edmonton newspapers last week the following facts were developed and set forth.

1. That the Edmonton Portland Cement Company was organized to purchase what is probably the largest marl deposit on the American Continent, located 14 miles west of the town of Edson on the main line of the Grand Trunk Pacific railroad and a large bed of fine blue clay five miles east of the marl deposit and also on the Grand Trunk Pacific; and to build on this property a Cement mill with a capacity of 1500 barrels per day.

2. This property has been thoroughly examined by Messrs. R.D. Hassan and T.J. Klossoski, the best known Cement Engineers and constructors on either side of the International Line. These gentlemen have built seventeen successful cement plants in the United States and Canada, including the famous International Plant at Hull. They have given their opinion briefly as follows:

(a) "The composition and quality of both materials is ideal for the manufacture of a high-grade Portland Cement, the marl being high in calcium, clean and comparatively uniform;

(b) The clay could not be surpassed for composition;

(c) The quantity of marl now in evidence is sufficient to run a fifteen-hundred barrel mill continuously for forty years. And this will undoubtedly be increased by complete surveys and testings;"

(d) And that Portland Cement can be manufactured on this property at a cost not exceeding 78 cents per barrel as follows:

Coal at \$2.50 per ton, 130 lbs. per bbl.16
Coal for drying clay01
Power at 3-4c per h.p. hour.17
Labor, 130 men at \$372 per day.31
Gypsum01 1-2
Office and Sales \$60 per day05
Insurance and taxes01 1-2
Small supplies, repairs, etc.02
Depreciation, not included in above03

— .78

3. The market for the entire output of the proposed plant is waiting at its very door. The City of Edmonton will consume 200,000 barrels of Portland Cement in 1911 and the demand is increasing. The construction work along the line of the Grand Trunk Railroad will consume as much more. The price of this cement is fixed by the factory cost at Eastern mills and freight rates to the Edmonton district. Not a bag will be bought for less than \$3.05 per barrel.

4. On the basis of the Edmonton market today the result of a year's operation of the plant of the Edmonton Portland Cement Company, reckoning on a minimum output of 312,000 barrels would be as follows:

Gross sales, 312,000 barrels at \$3.05	\$951,600
Cost of manufacture at78 \$243,360
Freight at25 78,000 311,360

Net profit on the year's business. \$640,240

5. The cost of manufacture has been verified by following the operations of a 1,500 barrel mill as follows:

Coal, 37,480 tons at \$2.50	\$ 94,700
Labor	108,800
Gypsum 570 tons at \$8.00.	6,960
Edmonton office	8,500
Small supplies and repairs.	10,000
Depreciation	9,360
Insurance and taxes	4,680

\$243,000

6. Both the marl and clay have been tested in the laboratories of Messrs. Thomas Heys & Son, Technical Chemists of Toronto. Their several analyses agree about as follows:

MARL.	
Carbonate of lime	90 p.c.
Carbonate of magnesia	2 p.c.

Silica	2 p.c.
Oxide of iron and alumina.	1 p.c.
Organic matter	5 p.c.

CLAY.

Silica	62 p.c.
Alumina	22 p.c.
Oxide of iron	4 p.c.
Carbonate of lime	4 p.c.
Carbonate of magnesia	4 p.c.
Alkalies of potash and soda.	1 p.c.
Organic matter	3 p.c.

THE RESULTING CEMENT.

as worked out by Messrs. Heys & Son.

Lime	65 p.c.
Silica	23 p.c.
Alumina	7 p.c.
Oxide of iron	3 p.c.
Magnesia	3 p.c.
Alkalies	trace

There is no better Portland Cement on the market than this.

7. The growth of the Cement Industry is the marvel of the industrial history of the world, as the following table will show:

GROWTH OF THE CEMENT INDUSTRY IN AMERICA FROM 1870

Number Barrels		Number Barrels	
Year	Produced	Year	Produced
1870 to 1879	82,000	1880	900,224
1880	42,000	1881	1,543,025
1881	60,000	1882	2,637,775
1882	80,000	1883	3,682,284
1883	90,000	1884	5,652,206
1884	100,000	1885	8,383,220
1885	150,000	1886	12,711,225
1886	150,000	1887	17,239,614
1887	250,000	1888	22,342,872
1888	250,000	1889	26,568,891
1889	300,000	1890	33,548,412
1890	335,300	1891	40,443,124
1891	451,913	1892	48,875,310
1892	547,140	1893	54,072,912
1893	590,625	1894	62,508,461
1894	780,571	1895	71,000,000

8. Concrete, the universally adopted construction material of the twentieth century, is Portland Cement, and crushed rock combined in about the proportions of 1, 3 and 5. It is universally used, not only in reinforced concrete construction for buildings, piers, piers, and for all the construction purposes of brick, stone and steel, but it is used for hundreds of purposes for which these materials are impossible. Not only is it used in enormous quantities for paving purposes and for building construction, but also for piling, tanks, bridges, roofs, flooring, certain types of boats and barges, such vast engineering undertakings as tunnels, subways, irrigation and reclamation projects, the modern monolithic house, tree preservation, ornamental concrete, a hundred domestic purposes on the farm such as concrete hens' nests, door steps, sidewalks, rat-proof corn cribs, sanitary cowsheds, and finally the most stupendous of all engineering undertakings the Panama Canal, where 3,000,000 barrels of Portland Cement, or 20,000,000 barrels of Concrete will be used.

9. The annual production of Portland Cement has increased in the past twenty years from 335,000 barrels to 74,000,000 barrels—twenty-two thousand per cent. and in the same time six hundred million dollars was invested in the Portland Cement Industry in the United States alone.

10. America and especially Canada is at the threshold of the greatest era of construction which the world has ever known; railroads are being spread like a net work over the land, towns and cities are being built, and within another generation the world's home signal, "the light in the window," will stretch an unbroken line from the Rocky Mountains to the Atlantic Coast. And in the next ten years the demand for Portland Cement will increase from 74,000,000 barrels in 1910 to 200,000,000 in 1920.

11. The two materials from which Portland Cement is manufactured, carbonate of lime and silica are derived respectively from marl or lime-rock, and clay, shale or slate. Naturally Portland Cement can be more economically manufactured where the necessary materials are both found. But as they have no geological association they are only found near together.

The whole American Continent has been prospected for these materials and the few locations where both are found have been long since taken up. The property of the Edmonton Portland Cement Company is the only known adjacent deposits of both marl and clay in the Province of Alberta and British Columbia.

12. Plants are now being located where either material is found and the other is shipped to the mill. The competing plant nearest the Edmonton Portland Cement Company ships its lime-rock 65 miles and its shale 28 miles. Plants are also being located with reference to distribution only and are shipping both materials. All of this increases the cost of production and advances the price of Portland Cement.

13. The Edmonton Portland Cement Company has an abundance of both materials in their most accessible form; can produce Portland Cement at the minimum cost of manufacture; and sell its entire output at the market price fixed by the disadvantages of its competitors.

14. The market at the very door of the Edmonton Portland Cement Company is now more than 400,000 barrels annually and increasing. This will absorb its entire output and freight rates alone will make competition impossible.

15. The Edmonton Portland Cement Company has materials for the manufacture of at least 12,500,000 barrels of Portland Cement under the most favorable possible conditions.

16. On the basis of present prices, the Edmonton Portland Cement Company can manufacture cement at a profit of \$2.00 per barrel. No one can now tell how much greater its future profits may become. These will be fixed by the increasing disadvantages of its competitors and an increasing market.

17. The Edmonton Portland Cement Company should distribute at least \$12,000,000 in dividends in the next twenty years, and every dollar of these dividends should be kept in Edmonton and vicinity.

18. The stock of the Edmonton Portland Cement Company has a present par value of \$1,500,000. On the basis of one-half its probable earnings this stock should go to \$3,000,000 in two years and \$7,500,000 in five years; that is to say the shares of the present par value of \$100 should go to \$200 in two years and to \$500 in five years. Every dollar of this great increase in value should enlarge the fortunes of Edmonton citizens.

19. The Edmonton Portland Cement Company is an Edmonton proposition. The property was discovered, respected and developed by Edmonton men. The directors of the Company are from the best citizens of this community and they have every one purchased liberally of its stock.

These directors are:

G. H. V. Bulyea, Lieutenant-Governor ..	\$10,000
W. S. Heffernan, Broker	10,000
S. H. Smith, President Western Realty Co.	5,000
W. D. Ferris, Physician and Surgeon	5,000
J. F. Landy, Broker	5,000
A. Driscoll, Dominion Land Surveyor	5,000
Jas. A. McKinnon, Real Estate	5,000
J. H. Garipey, Capitalist	5,000

Seven additional prominent gentlemen will shortly be added to this board. In addition to these directors a number of prominent Edmonton citizens have already subscribed to the stock of this company.

20. A prominent Edmonton banker has given it as his opinion that there is an abundance of idle capital lying in the great banks of Edmonton right now and belonging to Edmonton citizens to immediately finance this institution. Therefore not a share of its stock should go out of this community. There is no reason why this splendid enterprise should be turned over to the "interests" that would be glad enough to get it. Let us prove that Edmonton is the financial and commercial capital of Western Canada.

Shares are \$100.00 each and purchasers may subscribe for any number of shares from one to 250. Payments on the stock will be arranged to suit the convenience of the purchaser. Stock books open for subscription at the parlors of the King Edward Hotel at ten o'clock, Monday morning, May 15th.
